

Please do not implement any proposal that would lessen Indiana's Telephone Privacy Law. This law has substantially lowered the amount of unwanted telephone solicitations that we used to receive, which was around 2-3 per day. Many of these telemarketers were very rude and would call and ask for the other spouse when told to remove our names from their calling list. This law has allowed us to have a family dinner without the nuisance call. Please reconsider your proposal. Thank you.
